

Urbanloop pods network simulation

TELECOM Nancy - PIDR
From January to May 2019
victor.thevenon@telecomnancy.net
t
frederic.venier@telecomnancy.net

Project Information

Description (key question): Can the SDN paradigm improve the routing of pods in Urbanloop ?

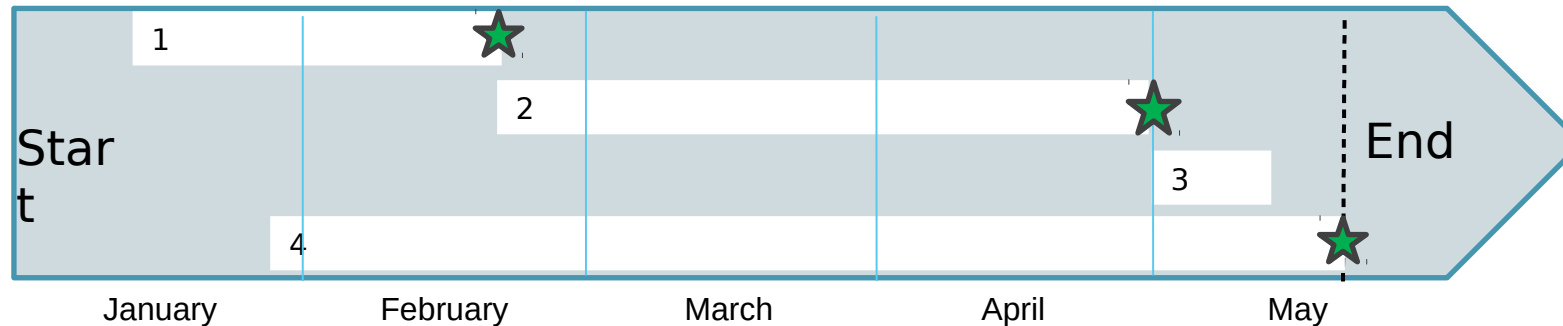

Objective : Design a SDN route management algorithm and validate it in the Urbanloop simulator.

Main deliverables: SDN route management implemented in the simulator and related tests results

Client: Urbanloop R&D

Interactions: previous work of TELECOM Nancy PI by Ms ASSELIN-BOULLÉ, Mr CHOCOT and Mr HENRY

2019 timeline

Action Plan

N°	Main milestones	Due for	Manager	Status, comments
1	SDN state of the art	February 24th	V.Thevenon	Work in progress
2	Design of the SDN route management algo.	March 15th		
3	Implementation in the simulator	May 1st		
4	Validation, tests	May 14th		
5	Reporting	May 21th
